About This Book

Their faces are so ugly only their mothers could ever love them...and *your* mother would never let you have one as a pet! The spotlight is on these strange-looking creatures that will captivate readers everywhere.

What makes an animal “ugly”? Often, it is some feature that makes one animal different from others. Take the male proboscis monkey, for example. They have HUGE noses! But apparently, female proboscis monkeys *prefer* males with large noses! From blue-tongued snakes to crazy-haired dogs, you can’t miss this fascinating extra-ugly read!
